

ENERGY/EARTHSYS 102 (WAY-SMA)
102 Fundamentals of Renewable Power
MWF 10:00-11:00 Remote, Spring, 3 units

- Do you want to understand the latest trends in electricity generation?
- Are you interested in learning about the most recent, and future, designs for green power resources including:
 - wind
 - solar
 - hydro
 - geothermal
 - biomass
 - waves & tidal?
- Do you want to understand what limits power extraction from renewable resources and how current designs could be improved?
- *We welcome all students* from nonmajors to MBAs to graduate students with interest in renewable energy. If you are potentially interested in an energy or environmental related major, this course is particularly useful.
