

# ESS/GS 205: Fundamentals of Geobiology

Fall 2020

Tuesday/Thursday 10:30-11:50 AM

Dr. Anne Dekas and Dr. Kevin Boyce

- Understand the physical, chemical and biological processes contributing to global biochemical cycling and climate
- Understand how life evolved and diversified through geological time
- Gain a greater understanding for the laboratory approaches used to study geobiological questions
- Meet and interact with the geobiology researchers at Stanford

\*Although listed as a graduate class, it is suitable for upper level undergraduates in Earth Systems, Geological Sciences and Microbiology
